Subject: Human Machine Interaction (CSC801)   **Sem:VIII**

Please share your own experience in using the things in day to day life. Provide Photo of the equipment with reasoning. Please refer the examples.

**Note : Please follow the mentioned guidelines.**

1. Please use the submission template.
2. The answers should be Hand written.
3. Limit your answer to maximum of 2 pages.
4. Incorporate pictures/ photographs/ screen shots wherever necessary.

Objective: To observe the surroundings and analyse the user interface and put the experience in own words with real pictures.

Outcome: Observation, Analysis and documentation of the experience.

Roll No. 43   Controls with ambiguous labels.

Ans: Eg- Making a Photocopy

ASSIGNMENT -1

Q. Controls with ambiguous labels.

→ Eg:- Making a photocopy.

In the figure above, imagine that you just put your document into the photocopier and set it to make 15 copies. Then you push the button with the "c" to start making your copies.

Here, 2 things can happen if you think :-
i) It makes the copies correctly.
ii) The photocopies settings are cleared and no copies are made.

But only (ii) will happen as the "c" stands for clear and not copy.
The copy button is actually the green button with the 'line in diamond' symbol.

Since many people do not know this that 'line in diamond' symbol is standard symbol for "start". So it is suggested that the word "start" could be added below the symbol making it obvious that this is the button to make copies.

Similarly, since the button label "c" is not a standard symbol, although it is used on some photocopiers & other devices.

The word "clear" should be added below the "c" symbol thus indicating its use.
